SUMMARY

Fourth-year programming student at Breda University of Applied Sciences. With a wide range of skills around game development in C++. Great at working in teams and passionate about making easy-to-use tools, experimental graphics programming, and making games.

EXPERIENCE

Nov 2025 — Jun 2026

Curtain Call - First-Person Action Adventure

Lead & Tools Programmer, University | Team Project

- Collaborating closely with Designers and Artists
- Experienced leading a larger team of programmers and handling inter-disciplinary discussions
- Developing and maintaining large code base in Unreal Engine 5

May 2025 — Oct 2025

Particle Based Fluid Renderer – Unreal Engine Plugin

Graphics Programmer, University | Team Project

- Working on low-level graphics in Unreal Engine 5
- Developing and implementing real-time volumetric rendering using raymarching
- Using custom data structures for high level optimizations

May 2025 — Jun 2025

Growth Plan - Narrative Puzzle Game

Gameplay & Tools Programmer, University | Team Project

- Creating tools for level designers to shape narrative and level beats.
- Maintaining a CI/CD pipeline for an Unreal Engine 5 project in Jenkins
- Taking ownership of odd jobs like 3D modeling, creating SFX, narrative, and more

Feb 2025 — Apr 2025

Kudzu - Voxel Game Engine

Gameplay & Tools Programmer, University | Team Project

- Architected a cross-platform game engine in C++ targeting PC and PS5
- Developed editor tools including settings window for custom physics engine, input mapping, and more
- Continuous QA through developing demos and integrating developer feedback

EDUCATION

2023 — 2027

Bachelors, Game Technologies

Breda University of Applied Sciences, Breda
